ST XTA plus 3 coilovers for BMW M3 (F80) and BMW M4 (F82)

The ST XTA plus 3 coilover suspension significantly improves both the driving dynamics and handling of any vehicle. This is also the case with sporty mid-range models such as the BMW M3 Sedan (F80) and the BMW M4 Coupe (F). Responsible for the performance gain are the KW dampers, which are independently adjustable in the ST XTA plus 3 in the low-speed compression stage, high-speed compression stage and low-speed rebound stage.

<p>BBS automotive GmbH Booth: B3-300 https://www.bbs.com</p> <p>Contact person: Mr. Peter Hintze</p> <p>Phone: +49 7576 9616-12</p> <p>E-Mail: hintze@mediatel.biz</p>	<p>„BBS Unlimited“ – suitable for all vehicles</p> <p>BBS flow-forming wheels in 19, 20 and 21 inches can be used with BBS hub adapters, vehicle-specific centering rings and innovative mounting materials for almost all vehicle types. Thanks to this maximum application variety, the wheel manufacturer, which belongs to the KW automotive group, will be able to cover almost all vehicles on the market in the future. The kick-off is the CI-R design as a BBS unlimited wheel.</p>

The special feature of the KW suspension is that it is not a coilover suspension for maximum lowering. Instead, the focus is on sporty ride comfort in conjunction with the compression and rebound adjustable damping technology of a KW V3 coilover suspension in near stock ground clearance.</p>

KW V5 Clubsport coilovers with Solid Piston Dampers for Mercedes-AMG GT R

The KW V5 Clubsport coilover suspension with aluminum unibal topmounts, racing springs and four-way adjustable KW Solid Piston dampers is designed for usage with semi-slick tires on production-based vehicles. During aggressive steering maneuvers and under heavy compression, the body structure of the Mercedes-AMG GT R remains perfectly supported. Even when cutting curbs, the GT R drives safely controllable at the limit.
